**Photographs Specifications for Medical Examination**

The photograph of each visa applicant must be an un-mounted, full-face photograph, taken within the past six months. A 'full-face' photograph is one in which the applicant is facing the camera directly. The applicant should not be looking down or to either side, and the face should cover about 50 percent of the photograph. Although variations in hair styles and in head coverings make it difficult to rigorously define the term 'face' in general the head of the applicant, including both face and hair, should be shown from the crown of the head to the tip of the chin on top and bottom and from hair line side-to-side. It is preferable that the ears be exposed. The key requirement is for the photograph to clearly identify the applicant.

The photograph should measure 2 inches square (roughly 50 mm square) with the head centered in the frame. The head (measured from the top of the hair to the bottom of the chin) should measure between 1 inch and 1 3/8 inches (25 mm to 35 mm) with the eye level between 1 1/8 inches to 1 3/8 inches (28 mm and 35 mm) from the bottom of the photo. Photos may be either in color or black and white and must be taken within the last six months. They must be taken against a white or off-white background. Any photos taken in front of busy, patterned or dark backgrounds will not be acceptable.

Head coverings are acceptable only under very limited circumstances (religious) and then only when the applicants' face is completely exposed. Using felt pen to avoid mutilation of the photographs, lightly print the name of the subject on the back of all photos.

**IMPORTANT:**

**PASSPORT MACHINE / BOOTH PHOTOGRAPHS ARE NOT ACCEPTABLE**
